NERVISM. [1963] [2p] 2refs
Order from: OTS, U.S.A. or ITC $1.10 TT-63-18527

Trans. from Bol'shaya Sovetskaya Entsiklopedia (USSR) 2d ed, 1954, v. 29, p. 470.

DESCRIPTORS: Physiology, *Nervous system

Nervism is defined as a new trend in physiology established by I. P. Pavlov. Nervism considers the organism as an entity which functions by constant interactions among the organs. The functioning of the organism and its relationship to the external environment are dependent upon the activity of the nervous system. The central nervous system controls the vital activities of the organism, both as to its internal physiology and its adaptation to its environment.

(Biological Sciences--Physiology, TT, v. 11, no. 1)
